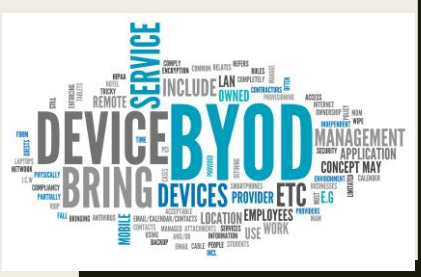
BOX ELDER SCHOOL DISTRICT WIRELESS ACCESS

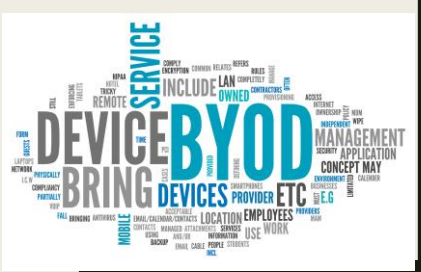
Instructions on how to connect your personal device to our network

Mac Devices

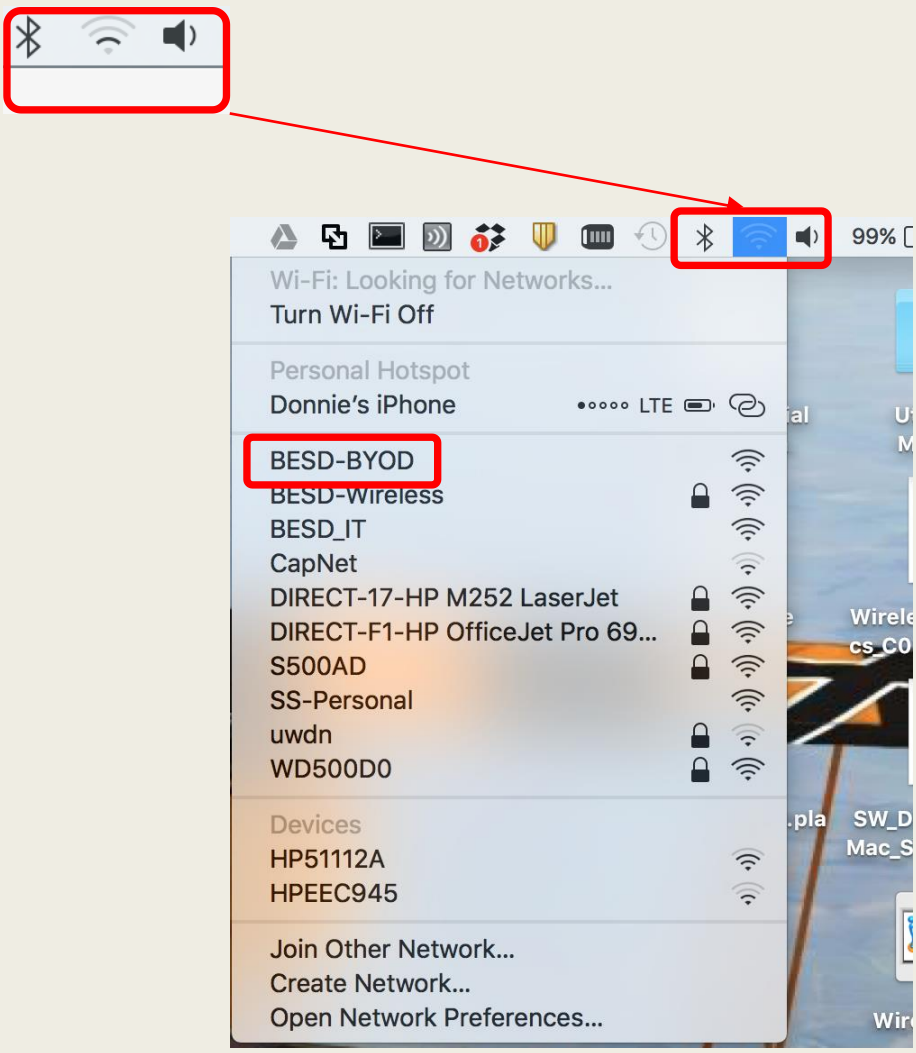


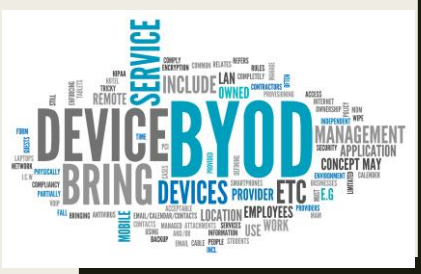
Curriculum

Box Elder School District will begin supporting the use of individually owned electronic devices, in compliance with district, school, and class rules/policies, on the network to support student's educational goals. We believe that by allowing students to use the same digital devices at school that they use at home we can enhance their learning experience. We also believe this change will support our efforts to leverage available technology to provide more personalized learning and improve feedback for our students as we utilize an increasing amount of digital curriculum and resources.

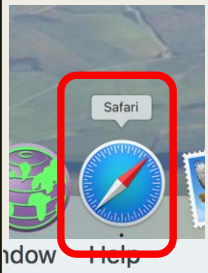


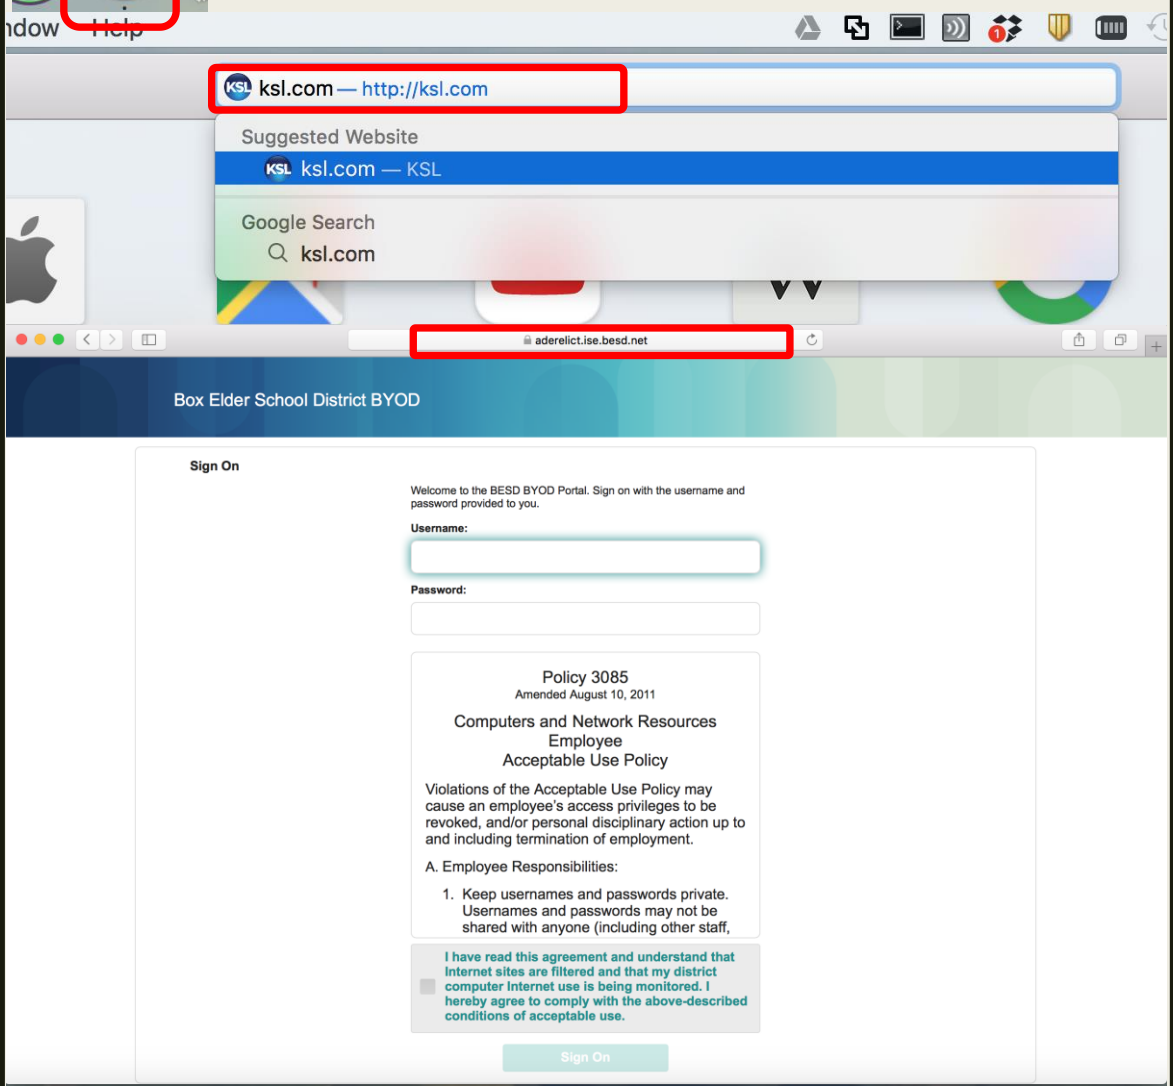
In the top bar on your Mac device, navigate to Wi-Fi and select the “BESD-BYOD” SSID and click on connect.



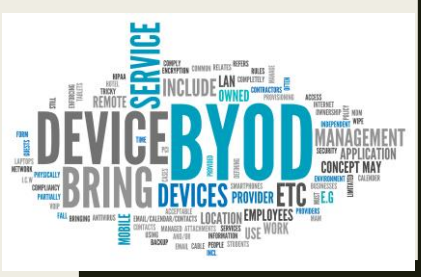


Next, go to your web browser and proceed to a website like http://ksl.com. At that point you will be redirected to our BYOD website

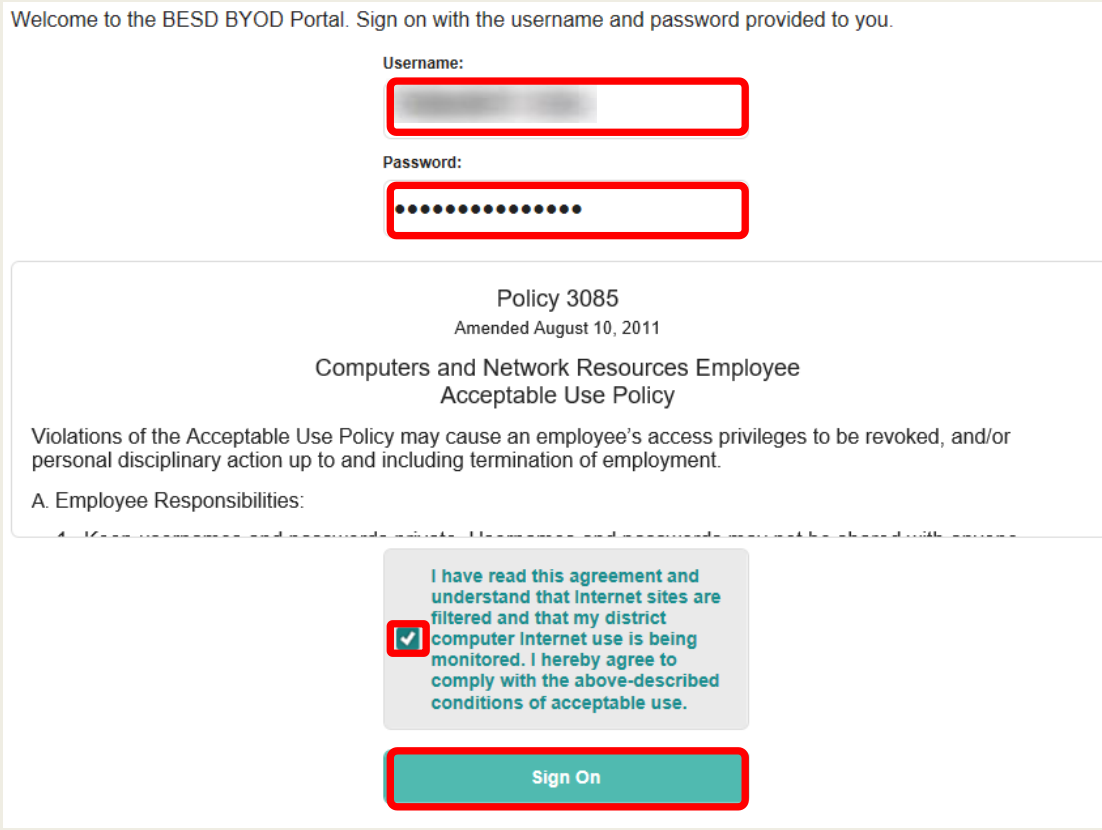


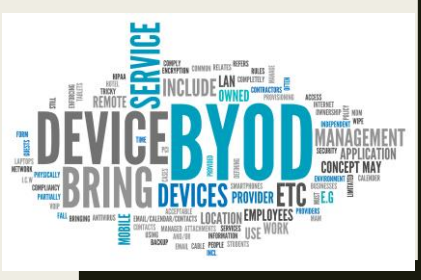


- Go to a non secured site like KSL instead of google

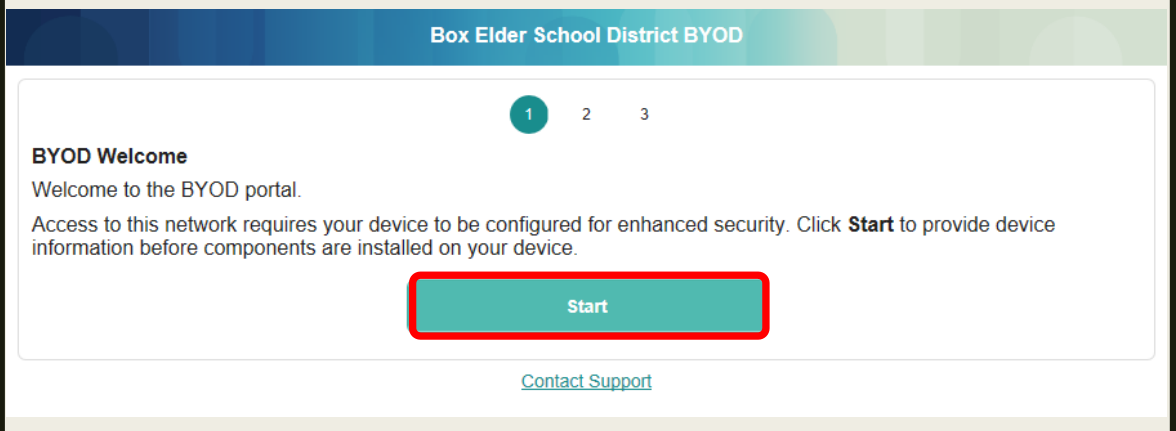


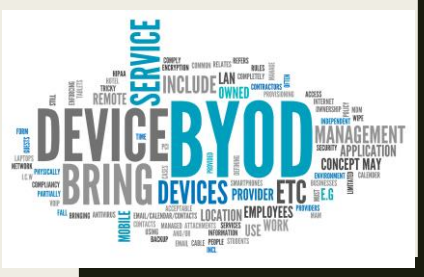
Use your BESD student credentials and password. In order to use our BYOD you must agree to our Acceptable Use Policy and click on the Sign in button.



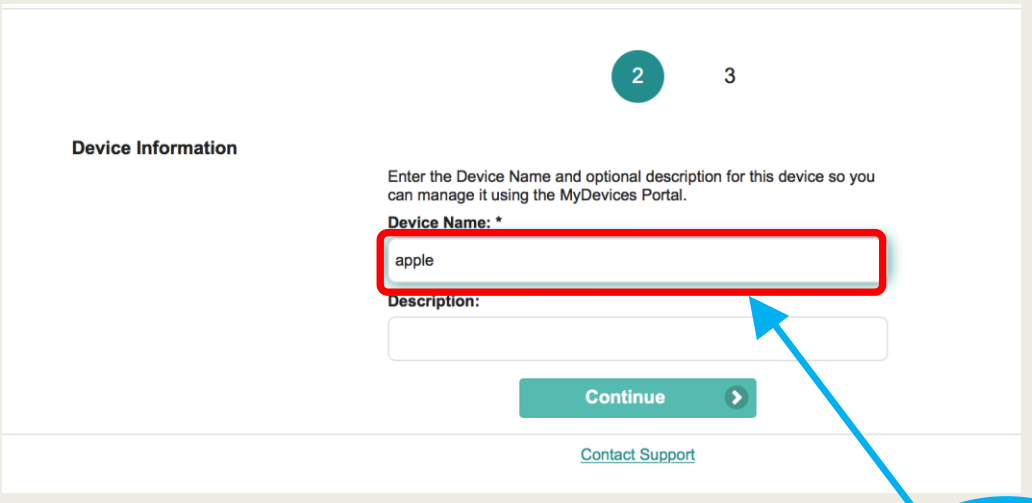


If successful, you should see the following page, if not ensure your entering the correct username and password. Select start



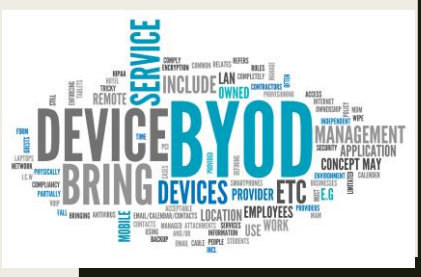


Type in a name for the device your registering.

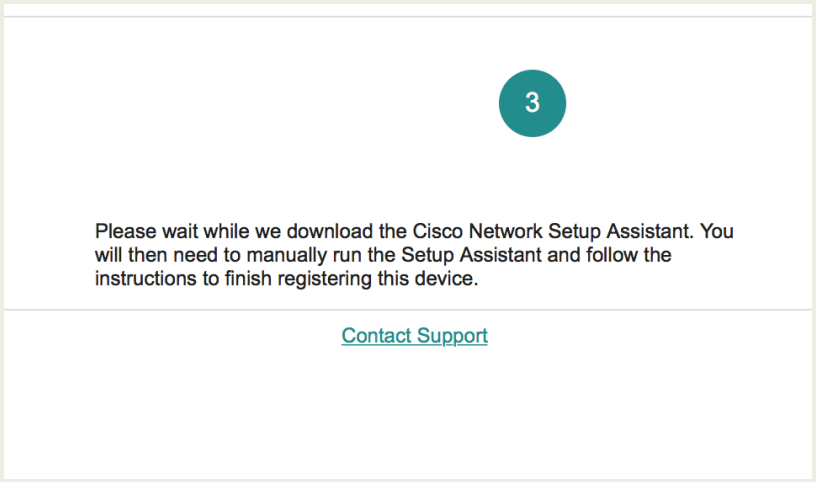


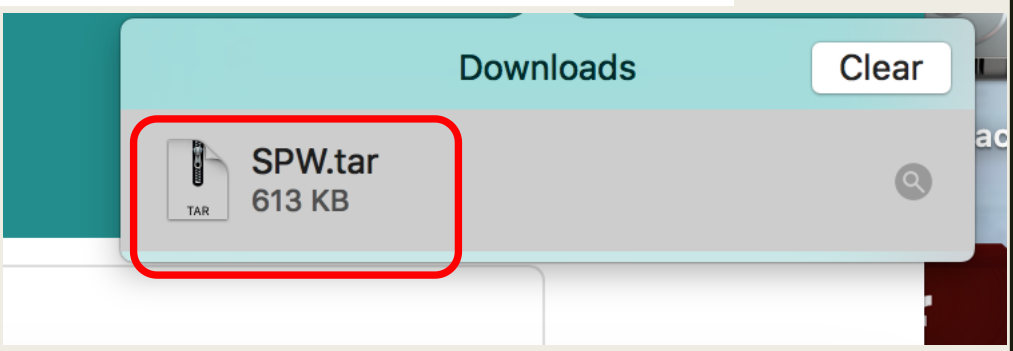
Required Field

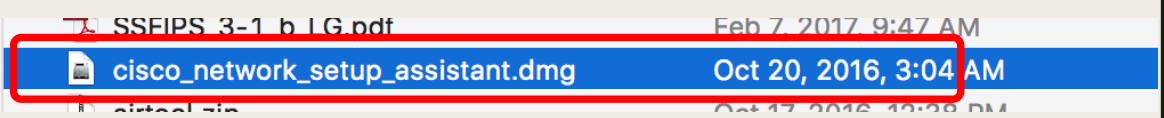
- Each user is only allowed to have two devices registered at any given time, therefore you would have to delete a device in order to register a third one.

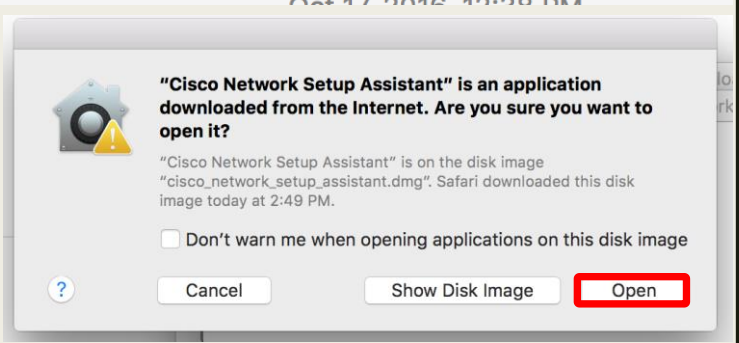


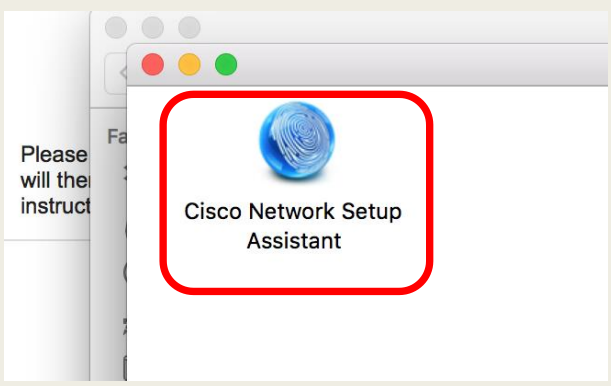
Click on “Save” button to download the Network Setup Assistant.

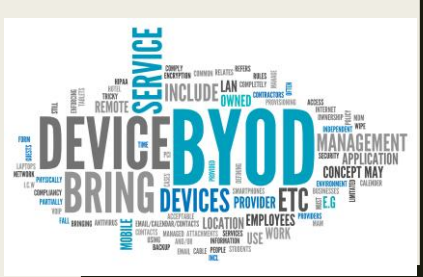




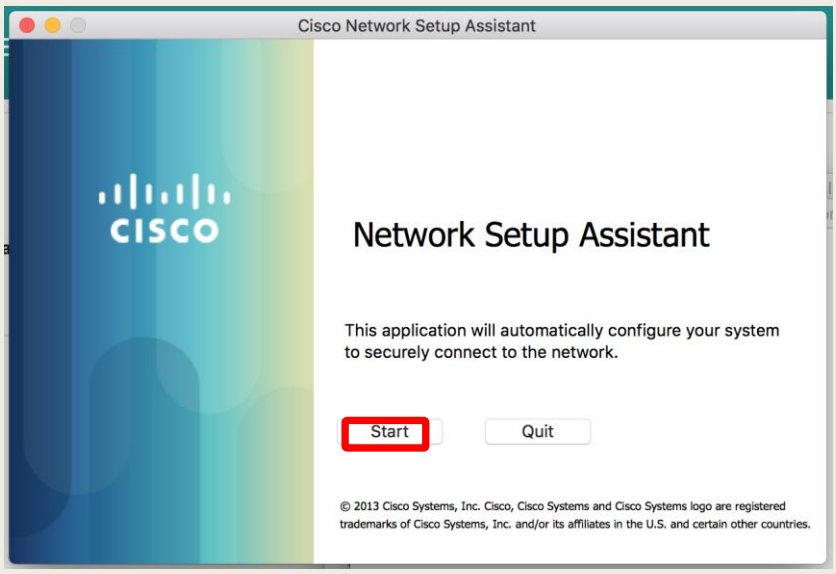


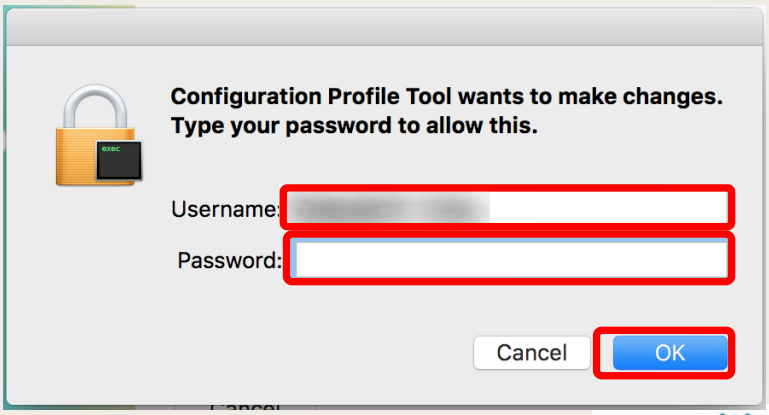


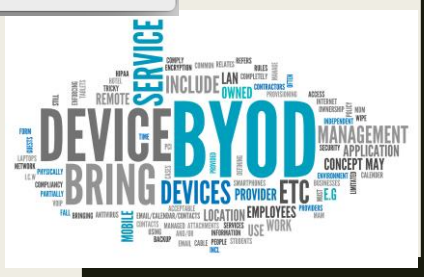




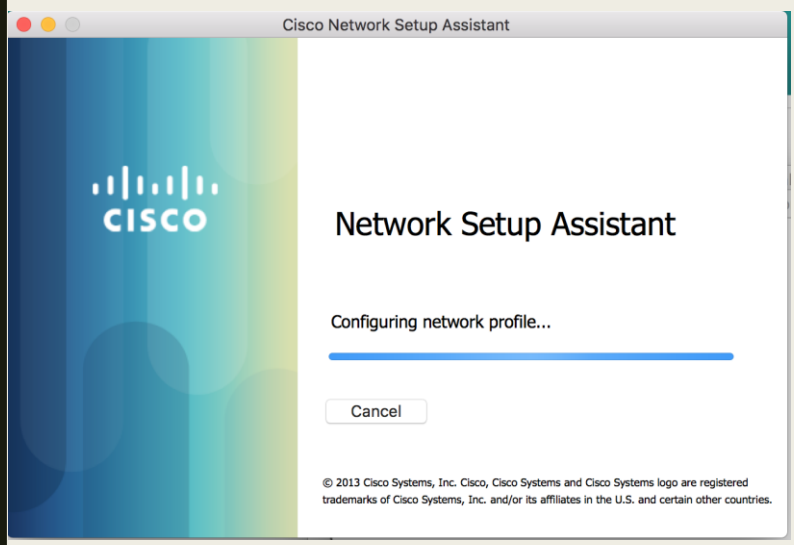
Click on “Start” and follow the instructions.

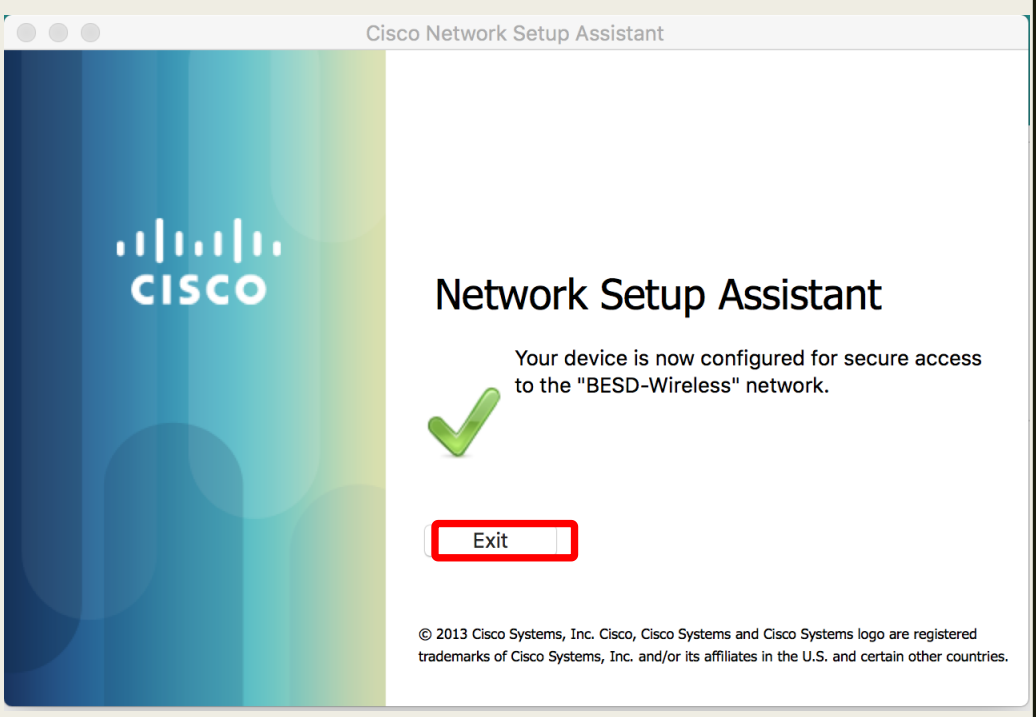


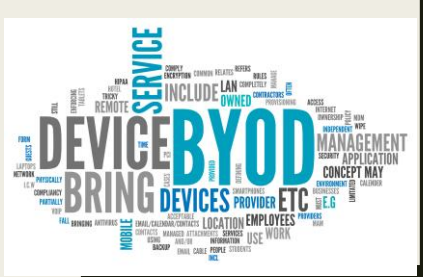




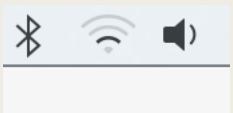
Wait for the Network Setup Assistant to finish installing and then click “Exit”

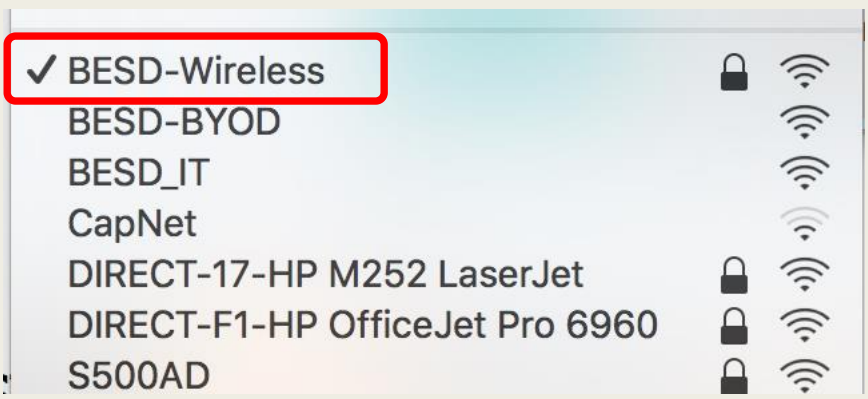


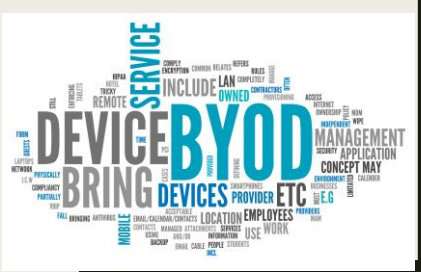


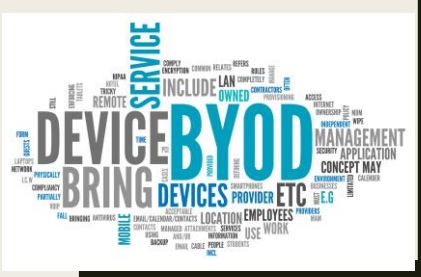


Once you have successfully on boarded your device, go back to your Wi-Fi settings and change it over to BESD-Wireless







Notes


- You will only have to go through this process once a year.
- To manage the devices you have enrolled follow this link: https://mydevices.ise.besd.net/
- There is a limit of 2 devices per individual
